Why Discuss Our Adaptive Methodology Now?

Adjusting to current market demands

- Organizations are looking for new approaches to successfully execute projects
- Traditional practices are no longer meeting business needs
 - Businesses are looking for new practices or services to improve:
 - ✓ Cost and budget management
 - ✓ Incremental delivery and execution change responsiveness
 - ✓ Change management
 - ✓ Flexibility and scalability
 - ✓ Governance
 - ✓ Sustainability

***KZenEdge's proven delivery services are designed to meet
your evolving requirements***

Our Continuing Journey and Evolution

Explore New Ideas and Build New Relationships

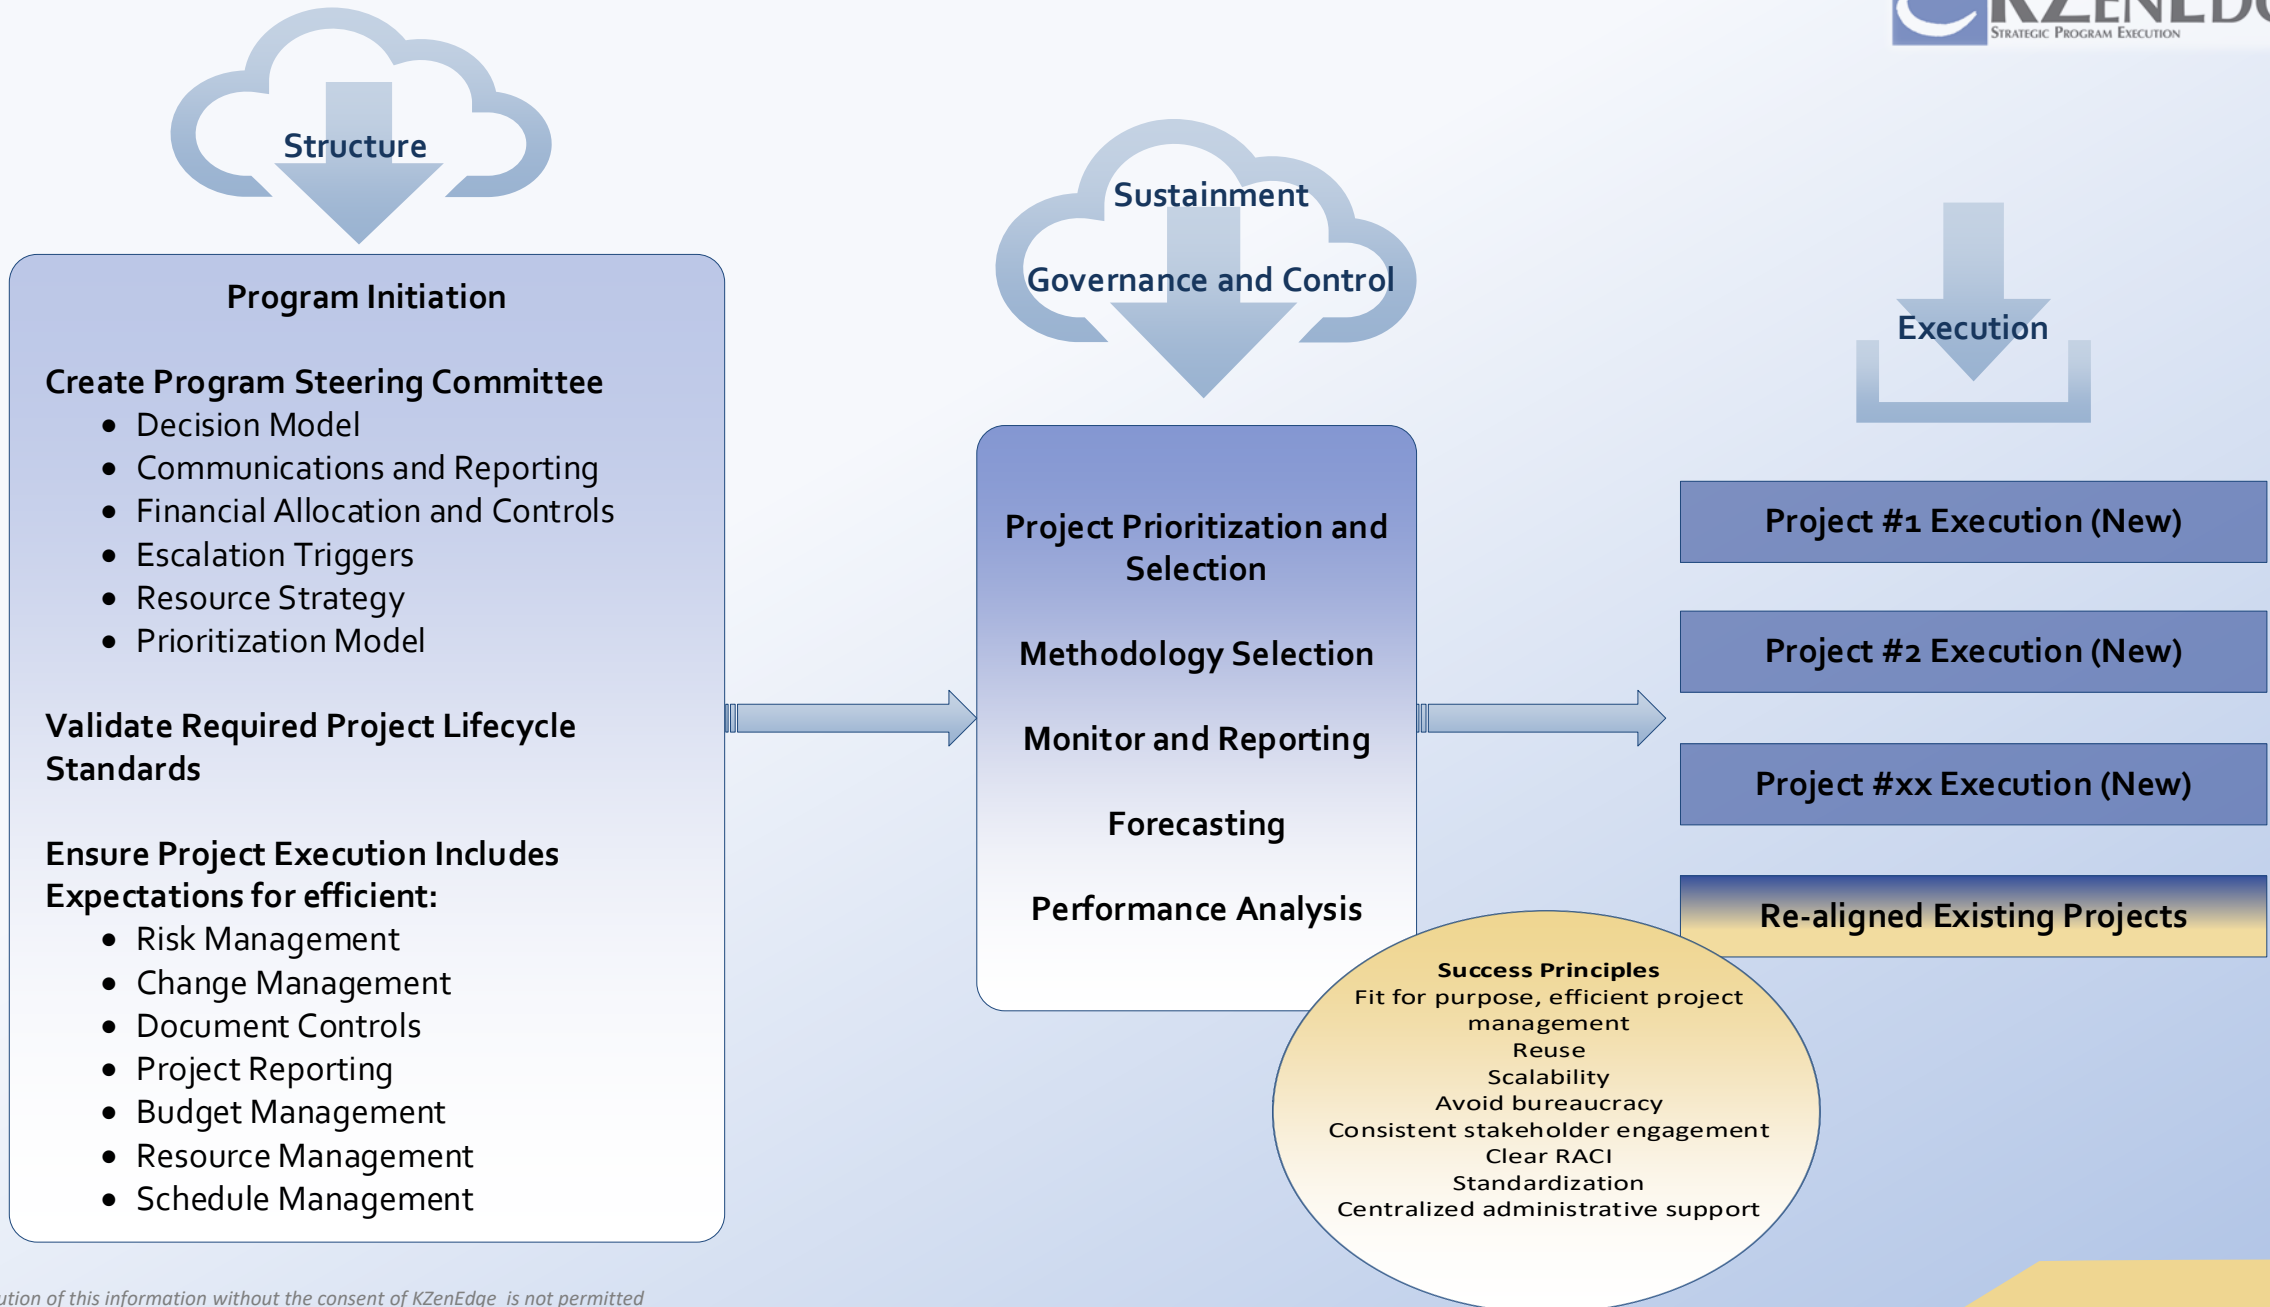

- KZenEdge, in the spirit of **thought leadership**, is committed to publishing articles to **share our experiences**
- We hope to **inspire and influence** our community to **generate new ideas** and **foster mutually beneficial relationships**
- This is part of an **ongoing continuum of information sharing** that we hope **you will find interesting and informative**
- Please provide feedback and share your experiences

Successful Adaptability

A Proven Formulae

- KZenEdge successfully applies our adaptive methodology by **integrating into existing client processes**
- We do this by:
 - ✓ Structuring of the client **governance model** to ensure **informed decision making**
 - ✓ Creating a function to ensure ongoing **project delivery sustainment and control**
 - ✓ Assigning execution practitioners that are experienced in a **diverse array of project delivery methodologies**
- These process components are underpinned by **success principles** that continuously strive to meet **evolving client requirements**

Alternate Approaches and Methodologies to Achieve Business Outcomes

KZenEdge adaptive methodology is applied when we use our experience to recommend the execution methodology based on the client’s project environment, business expectations and the delivery risk profiles.

Organizations moving towards a more agile environment should consider that the evolution from Waterfall to Agile needs to remain flexible enough to accommodate the alternative approaches.

Summary

One Part of the Puzzle

- This presentation was not produced to discuss the components of specific project methodologies. There are literally thousands of techniques that may be incorporated into any given methodology. Our senior practitioners would love to debate the value and application of them all.
- When we describe our adaptive methodology, the fundamental KZenEdge differentiator is the way we adapt to the client environment to create a governance structure. We apply best practices to processes that add value and enable clients to meet their objectives.
- Key inputs and decisions are required to ensure project success during the planning stages of projects and programs. KZenEdge has worked to enhance this process as a critical foundation for our proven service delivery.

Thank You!

The KZenEdge Thought Leadership Journey Continues...

We hope this overview provides additional insight regarding our adaptive methodology, and how it can contribute to your success!
